

UK Early-Career Cloud Physics Group 2026 Symposium

Photo by Lilli Freischem 2025

19-20 March 2026

University of Oxford, Department of Physics

This symposium grew out of a simple observation from our own PhD experience: research groups across the UK don't often have the opportunity to engage with one another's work. We thought: **why not** get everyone together and change that?

The aim is to strengthen knowledge exchange, collaboration and community across UK institutions, with a focus on early career researchers.

We hope this symposium helps revive subject-specific domestic meetings in our field. These meetings are vital to the continued strength of cloud and atmospheric physics research in the UK. They introduce new ideas and collaborators, help shape research directions, and support researchers in exploring and planning their future careers.

**Register your
interest now:**

Unable to attend in person? Register to engage virtually and we'll help ensure your research is visible to the community.

Organised by: members of the Climate Processes Group, University of Oxford
